라즈베리파이 LED Web으로 제어하기

Python WSGI 마이크로프레임워크 (파이썬으로 웹어플리케이션 제작)

Flask

web development,
one drop at a time

WSGI : Web Server Gateway Interface.

- 서버가 웹 어플리케이션과 통신하기 위한 Interface.
- 최소한의 기능만을 제공하여 유연하게 애플리케이션 작성 가능

1. pip를 이용 Flask 설치

```
$ sudo pip3 install flask
```

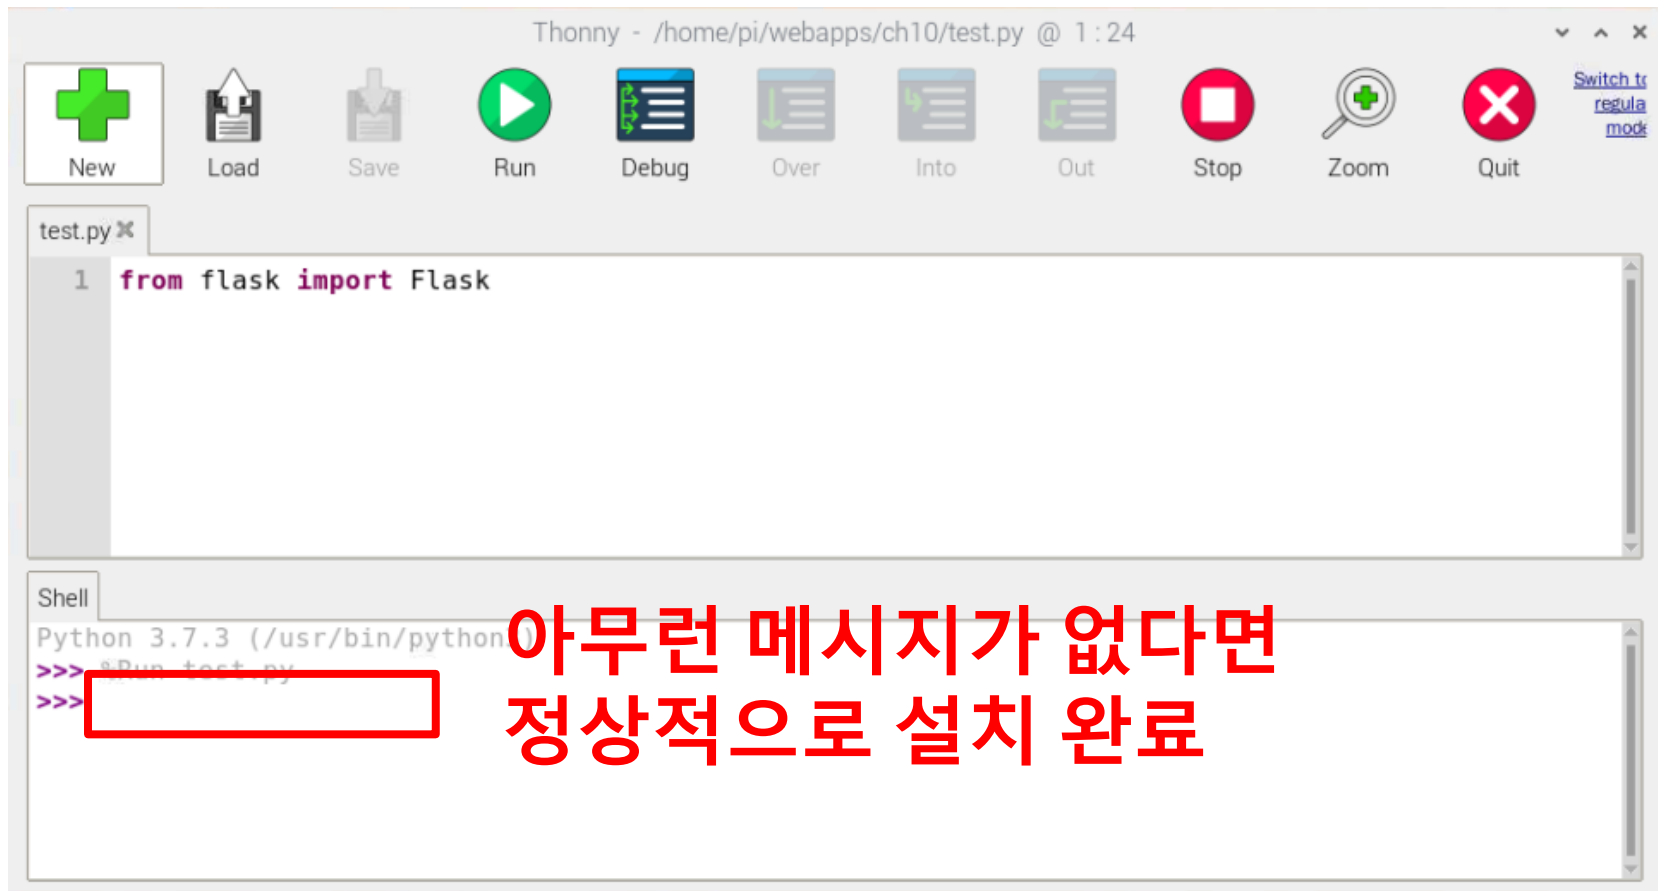

※ pip버전이 낮아 설치 오류 시

```
$ sudo pip install --upgrade pip
```

```
$ sudo pip install flask
```

2. Thonny Python IDE 실행

```
from flask import Flask
app = Flask(__name__)

@app.route("/")
def hello():
    return "Hello World!"

if __name__ == "__main__":
    app.run()
```

Flask 웹서버 구축하기

센서값 저장

1. pip를 이용 MySQL 설치

```
$ sudo apt-get install mariadb-server
```

2. MySQL 접속

```
$ sudo mysql -u root
```

1. 데이터베이스 생성

```
CREATE DATABASE Test;
```

2. 데이터베이스 선택

```
USE Test;
```

3. 테이블 생성

```
CREATE TABLE sensordb (  
    sensing INT,  
    ts TIMESTAMP DEFAULT CURRENT_TIMESTAMP  
);
```

1. pip를 이용 PyMySQL설치

```
$ sudo pip install PyMySQL
```

```
$ sudo apt install python3-pymysql
```

3. 테이블 생성

```
CREATE TABLE test (  
    sensing INT,  
    ts TIMESTAMP DEFAULT CURRENT_TIMESTAMP  
);
```

- PyMySQL 사용 : **import pymysql as ps**

```
import pymysql as ps
```

- MySQL연결 : `ps.connect()`

```
db = ps.connect(  
    host="localhost",  
    user="root",  
    passwd="",  
    db="Test",  
    charset="utf8")
```

root권한 에러 발생

```
pymysql.err.InternalError: (1698, "Access denied for user 'root'@  
'localhost'")
```

root 비밀번호 권한 변경

```
$ sudo mysql -u root -p  
mysql > USE mysql  
mysql > SELECT User, Host, plugin FROM mysql.user;
```

```
+-----+-----+  
| User           | plugin           |  
+-----+-----+  
| root           | auth_socket      |
```

```
$ sudo mysql -u root -p
mysql > USE mysql
mysql > UPDATE user SET plugin='mysql_native_password'
        WHERE User='root';
mysql > FLUSH PRIVILEGES;
mysql > exit;
```

user	host	plugin
root	localhost	mysql_native_password

- 데이터 삽입(INSERT)

1. Cursor Object 가져오기 : `cursor = db.cursor()`
2. SQL 실행하기 : `cursor.execute(SQL)`
3. 실행 mysql 서버에 확정 반영하기 : `db.commit()`
4. DB연결 닫기 : `db.close()`

```
insert_sql = "insert into memberinfo (id, pw, name, age) values('a','456456','에이',22)"
```

```
cursor.execute(insert_sql)  
db.commit()
```

```
curs = db.cursor()  
sql = 'insert into sensordb(sensing) values(1023)'  
curs.execute(sql)  
db.commit()
```

RASPBERRYPI

```
import spidevRead as sr  
  
while True :  
  
    readData = sr.analog_read(0)  
  
    print(f'analogRead : {readData}')  
    time.sleep(0.5)
```

while True :

```
    readData = sr.analog_read(0)
```

```
    print(f'analogRead : {readData}')
```

```
    sql = f'insert into test(sensing) values({readData})'
```

```
    curs.execute(sql)
```

```
    db.commit()
```

```
    time.sleep(2)
```

```
from multiprocessing import Process
import time

def test_1(start, end):
    for i in range(start, end, 1) :
        print( i )
        time.sleep(1)

pro1 = Process(target = test_1, args=(1, 100))
pro1.start()
pro1.join()
```

- 데이터 조회(SELECT)
 1. Cursor Object 가져오기 : `cursor = db.cursor()`
 2. SQL 실행하기 : `cursor.execute(SQL)`
 3. mysql 서버로부터 데이터 가져오기 : **fetch 메서드 사용**
 - `fetchall()` : Fetch all the rows
 - `fetchmany(size=None)` : Fetch several rows
 - `fetchone()` : Fetch the next row

- 데이터 조회 : SELECT

```
select_sql = "select * from memberinfo;"  
cursor.execute(select_sql)  
result = cursor.fetchall()  
print(result)
```

```
def insertSensingData ():  
    while True :  
        readData = sr.analog_read(0)  
        print(f'analogRead : {readData}')        sql = f'insert into test(sensing) values({readData})'  
        curs.execute(sql)  
        db.commit()  
        time.sleep(2)  
  
pro1 = Process(target = insertSensingData)  
pro1.start()  
pro1.join()
```

```
from flask import Flask
app = Flask(__name__)

@app.route("/sensor")
def getSensor():
    select_sql = 'select * from test;'
    curs.execute(select_sql)
    result= curs.fetchall()
    r=','.join(map(str,result))
    return r

if __name__ == "__main__":
    pro1 = Process(target=insertSensingData)
    pro1.start()
    app.run(host="192.168.137.131")
    pro1.join()
```
